

We have you scheduled for surgery with Dr. Leslie Vidal on _____

**You will check in at Dillon Health Center
365 Dillon Ridge Rd Dillon, CO 80435**

A member of our team will call you one business day before your surgery to confirm your check-in time and go over a few last-minute details. Most patients will check in between 6:00AM and 12:00PM.

Food and Beverage Restrictions the Day of Surgery

Per Anesthesia and regulatory guidelines, there is to **be no food or liquid consumption within 8 hours of check-in to the surgical facility. Nothing is allowed by mouth within the 8 hours leading up to your check-in time. *This includes gum and chewing tobacco.**

Please see attached “Pre-Op Medication Reference Sheet**” for a complete list of medications that should be discontinued or modified prior to surgery.**

Checklist of tasks to complete *before* the day of surgery:

Day-of-Surgery Game Plan:

Surgery is an all-day event so please plan accordingly. If you have a morning surgery scheduled, you might want to consider a hotel room in the Vail/Edwards area the night before surgery to avoid any travel stress the morning of surgery. We have a Concierge Team that can assist with these arrangements; their number is (970) 479-5898.

After surgery, patients must be discharged to a responsible party following their procedure – be sure you have arranged a ride home by a responsible adult; you cannot drive yourself home from surgery.

Post-Op Physical Therapy:

Dr. Vidal would like you to begin Physical Therapy starting approximately one week after surgery. Please let us know if you have a physical therapist that you would like to see. If you do not, we are more than happy to give some references of Physical Therapists that Dr. Vidal recommends. Please call 970-479-1580 for recommendations.

We will provide you with a physical therapy script either at the time of surgery or at your first post-operative appointment. We recommend you set up your post-op physical therapy visits prior to surgery when possible, so there are no scheduling issues. It is your responsibility to schedule your post-op physical therapy appointments at your earliest convenience.

If applicable: Complete Your Pre-Op Medical Clearance:*

You will be notified by our team if a pre-operative medical clearance is required for your surgical procedure. Pre-ops are customarily completed by your Primary Care Physician. They must be completed within 30 days of your surgical procedure. **RESULTS MUST BE FAXED TO OUR OFFICE AT: 970-237-5599. If these results are not received by our team within 4 business days prior to your surgery, we will reschedule your procedure.**

Post-Op Appointments:

Dr. Vidal's team will set up your first two post-op appointments at the time that your surgery is scheduled; She sees patients in both the Vail and Frisco locations. Please contact us at: (970) 476-3375 if you need to change or modify your post-op appointments.

Work Letter, School Letter, FMLA Paperwork, Ski Pass Reimbursement:

If you need a letter from your doctor for work or school purposes, please let us know as soon as possible. Please email those forms to our Athletic Trainer, Samantha Genno, ATC at sgenno@thesteadmanclinic.com and she will get them taken care of.

Rescheduling your surgery:

If you need to reschedule your surgery please call our office **IMMEDIATELY**. Our direct line is (970) 476-3375.

Dillon Health Center Directions

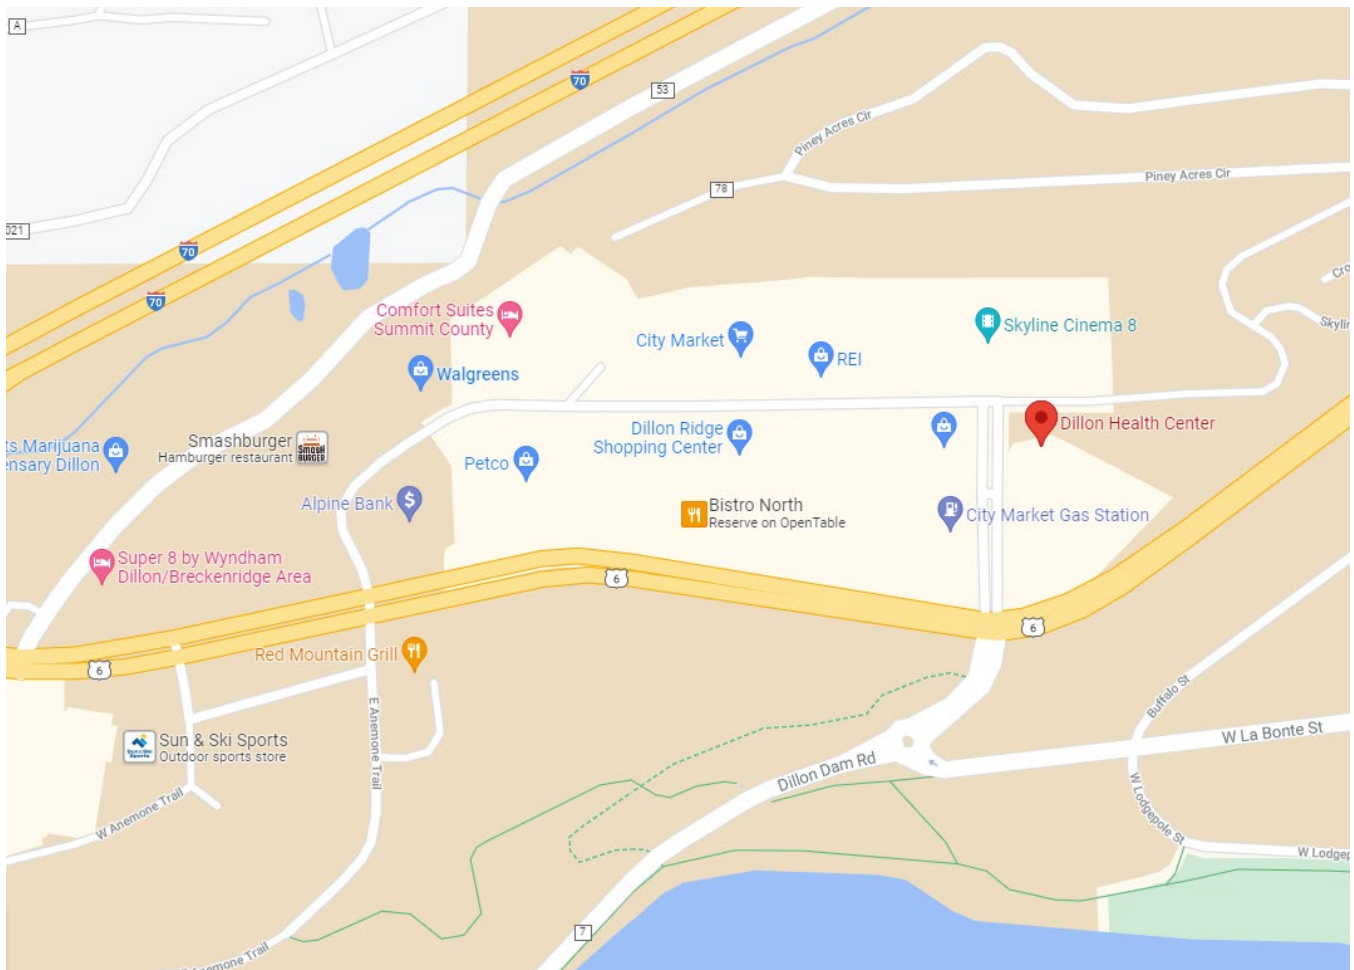

365 Dillon Ridge Rd
Dillon, CO 80435

From Denver (East)

3. Turn left onto N. Dillon Dam Road
4. Turn right onto Lookout Ridge Dr. and immediately turn right into the Dillon Health Center parking lot

SURGERY INSURANCE / FINANCIAL

Due to the ever changing insurance industry and the multiple plans offered by each insurance carrier, it is best that you confirm The Steadman Clinic's participation by calling your insurance company. Please provide them with our:

Tax ID #: 84-1415470

Physical Address: 181 West Meadow Dr. Suite 400 Vail, CO 81657

Prior to surgery, our insurance department will call your insurance company for a prior-authorization. Please note: A PRIOR-AUTHORIZATION IS NOT A GUARANTEE OF PAYMENT. If insurance does not cover your surgery, either in full or in part, any remaining balances become the patient's responsibility. Additionally, per your specific surgery plan, you may be asked to SIGN A WAIVER and PAY FOR procedures commonly not covered by insurance.

It is The Steadman Clinic's policy to collect on any: past due balance / deductibles / co-insurances / out of pocket monies prior to your scheduled surgery. A Surgical Authorization Specialist from our clinic will call you for your payment.

If you have any questions regarding insurance or payment, please reach out to: Alyssa Choate at (970) 479-6558

There may be other charges associated with your surgery that include, but are not limited to: facility, anesthesiologist, and physical therapy. If you have any questions regarding these charges, direct contacts are listed below:

- If you have insurance questions for the facility or anesthesia, please find their contacts below:

Dillon Surgery Center: 970-470-7170

Anesthesia Partners of Colorado: 970-315-3858

Alyssa to help make this process easier, so if you do have any questions, she is available via email at achoate@thesteadmanclinic.com or by phone at (970) 479-6558.

PRE-HAB PROGRAM

If you are scheduled for surgery, your physician may want you to attend a Pre-Hab session. This session will be scheduled with one of our physical therapists prior to your surgery. It is designed to help you prepare for your surgery and post-operative course. Our therapists work very closely with our surgeons and understand the intimate details of their protocols. The education and instruction provided in these Pre-Hab visits will ensure a smooth transition following surgery to help you achieve the best possible outcome from your procedure.

WHAT TO EXPECT AT YOUR PRE-HAB SESSION:

A physical therapist will perform an evaluation of current pathology and associated functional limitations as well as provide you with an overview of the entire rehabilitation process including:

- Fitting and issuing specific durable medical equipment (DME) i.e. slings, braces, crutches, etc.
- Post-op restrictions specific to your injury and procedure
- Early post-operative exercises
- Education of the signs and symptoms of infection or blood clot
- Wound care, bathing and grooming
- Sleep posture, mobility training and transfers after surgery
- Post-operative use of ice machine and ice pad

If you have further questions or need to schedule a pre-hab appointment, please call Howard Head Physical Therapy.

Howard Head Vail location: 970-479-5157

Howard Head Frisco location: 970-668-3169

Dillon Surgery Center offers patients the convenience and privacy of a secure, online registration process. If you are a new patient to our center, please go online today to complete your registration using the login information below. You will be asked about your health history, medications, and previous surgeries. If you are a returning patient, please update your online form. It's important to complete or update your online registration as soon as possible so that your medical team will have time to review your information prior to your visit. We will call you if we have any questions or concerns. We look forward to seeing you soon!

New Patients

1. Go online to:
www.simpleadmit.com
2. Go to: "Patients Start Here."
3. Enter the following password:
DILLON970

Date - _____

Procedure - _____

Surgeon - _____

Please complete your online questionnaire as soon as possible. A nurse will call you if necessary.

Returning Patients

If you received an email with login instructions:

1. Click the web page link in the email. You will be redirected to a login page.
2. At the login page, your **Access Token** will be entered automatically.
3. Enter your date of birth using the "**MM/DD/YYYY**" format.
4. After entering your Date of Birth, click "**Resume**." You can then review and modify your most recent health history form by clicking "**Resume Questionnaire**." If the form is in a read-only status, click on the "**copy form**" button to update your new procedure information and health history.

If you printed or saved your login instructions:

1. Go online to: dillonsurgerycenter.simpleadmit.com
2. Follow the link: "**Patients Start Here**."
3. Enter your secure **Access Token** that you saved or printed.
4. Enter your date of birth using the "**MM/DD/YYYY**" format.
5. After entering your Access Token and Date of Birth, click "**Resume**". You can then review and modify your most recent health history form.

**Please note, you would only have the Access Token if you have previously completed the online pre-admission form and either printed or saved your Access Token or entered your e-mail address requesting that the token be emailed to you. The token is sent to the e-mail address you provided. If you no longer have your Access Token, please contact Simple Admit at (877) 848-4726.*

Pre-Surgical Planning – Infection Prevention

Thank you for choosing Vail Valley Surgical Center for your care. We are committed to your well-being.

With all surgeries, there is a small risk of infection. We have a very low surgical site infection rate and work very hard to prevent infections. We want you to get involved and play a role in your health.

Because skin is not sterile, we would like to reduce the number of those germs on your skin and decrease the risk of a surgical site infection by having you start a special skin cleanser before your surgery.

Getting Your Skin Ready for Surgery

Chlorhexidine Gluconate (CHG) 4% is a special chemical found in soaps such as Hibiclens and other brands of soap that are antimicrobial soaps used prior to surgery. Everyone's skin has germs; this soap can reduce the number of germs on your skin and help to prepare your skin for surgery. You can obtain this soap at any over the counter pharmacy such as Walgreens, City market, Wal-Mart etc.

Follow these instructions to reduce your risk of infection:

Shower or bathe one-time-a-day for 3 days prior to surgery with CHG 4% liquid soap AND the morning of surgery making a total of 4 showers:

Step 1: Wash your hair, face, and body with your normal soap, shampoo, and conditioner. Rinse completely.

Step 2: Turn off the shower or step out of the bathwater.

Step 3: Pour 1 oz. of liquid CHG soap onto a wet, clean washcloth and wash your entire body, avoiding the neck up and pubic region. Do not use CHG on hair, face or pubic region.

Step 4: Rub the soap filled washcloth over your entire body for 3 minutes, again avoiding the neck up and pubic region.

Step 5: Turn on the shower or return to the bath and rinse the liquid CHG soap off your body.

Step 6: Towel Dry.

Shower 1

Shower 2

Shower 3

Shower 4

- You may apply skin lotion after your shower only on the 3 days prior to your surgery, NOT the morning of your surgery.
- On the morning of your surgery, DO NOT apply lotion, powder, oils, make up, perfume or aftershave.
- DO NOT shave or remove body hair below the neck for 1 week prior to surgery.

Facial shaving, facial lotion and chap stick are permitted the morning of your surgery.

If you are allergic to CHG or unable to get soap, substitute an antibacterial soap (ex. Dial Gold) instead.

STOP using the soap and call your doctor if you have a reaction such as redness, itching, rash, blistering etc.

Frequently Asked Questions:

May I Drive?

You may not drive for 24 hours after your operation or while taking narcotic pain medication such as Vicodin or Percocet. Please talk to Dr. Vidal or a team member to determine when it is safe to drive following your specific procedure.

What/when can I eat?

We suggest that you eat lightly the first 24 hours after surgery. Try to drink lots of clear liquids.

When can I resume my regular medications?

You may resume your medications when you get home, unless otherwise instructed.

What is an adverse reaction to a pain medication?

Rash, itching, dizziness, nausea/vomiting, constipation. Call your doctor if these problems occur.

May I drink alcohol?

You may not drink alcohol for the 24 hour period following your surgery, nor are you allowed to drink alcohol while taking narcotic pain medicine.

How much pain should I expect?

Everyone will experience different amounts of pain but, following your surgery, you can expect to feel pain after the numbing medicine has worn off. This will probably last at least several days, but should gradually improve.

When should I take my pain medicine?

Pain medicine should be taken only as directed by your physician. Begin pain pills before the pain gets out of control, as it takes 30-45 minutes for it to take effect. Remember, pain pills are designed to make the pain tolerable- not to fully take it away.

Pain pills may produce some loss of judgment and coordination; therefore it is best to limit your activities until the effects wear off. Sometimes pain medication can cause nausea and constipation. You may use over-the-counter treatments for this. To avoid nausea, we recommend that you eat something before taking your pain pills. To avoid constipation, increase your fluid intake, and you may use a stool softener or laxative.

When should I expect to return to work?

You may return to (sedentary) work or school 2-3 days after surgery if pain is tolerable. Return to heavy labor or excessive ambulatory activities will be determined by your doctor. Please talk to Dr. Vidal or a team member to determine when it is safe for you to return to work following your specific procedure.

GAME READY®
ACTIVATE NEXT-LEVEL INJURY & POST-OP RECOVERY

Cold Therapy. Circulating ice water continuously and consistently cools your injury site to safely and comfortably reduce pain and swelling.

Intermittent Compression. Gently squeezes and releases to remove swelling, stimulate the flow of blood, and conform the wrap to your body.

Dual-Action Wraps. Anatomically designed, circumferential wraps surround your injury site, covering more surface area for deeper cooling.

Simple Controls. The system makes it easy to use pre-set programs and quickly customize temperature, compression, and time settings.

GAMEREADY ICE + COMPRESSION MACHINE

(970)-471-6267

FINISH STRONG AND GET BACK TO BEING YOU

After an orthopedic injury or surgery, you play a critical role in the recovery process. The Game Ready® cold and compression system allows you to reduce pain and swelling while reducing the use of opioid medications. All so you can finish strong, maximize your rehab, and get back to the things that matter as quickly as possible.

Faster, deeper, longer-lasting cooling for proven therapeutic benefits:

- ✓ Reduces your opioid consumption and may allow for earlier discontinuation of opioid medications in certain patients.^{1,3}
- ✓ Decreases pain and swelling.^{1,4}
- ✓ Can increase post-operative range of motion.³
- ✓ May increase your satisfaction with the recovery process.^{1,5}

*"Game Ready provides a significant decrease in the need for pain medication and at least a 20% faster recovery."***

Peter Millett, MD, MSC | The Steadman Clinic

You play a critical role in your recovery after injury or surgery. Game Ready is here to help.

Innovative wrap design for better comfort and results.

Anatomically engineered for all major body parts, Game Ready's patented wraps ensure better fit, greater comfort, and circumferential coverage for more effective therapy.

Trusted by top physicians, professional sports teams, elite athletes, and special military forces around the world, the Game Ready System takes traditional RICE methods [Rest-Ice-Compression-Elevation] to the next level.

THERMAL IMAGERY SHOWS THAT GAME READY OUT-COOLS THE COMPETITION**
